Dealing With Rootbound Plants

1. It is important to loosen coiled roots before planting so they will grow into the soil. With your hands, tease the roots apart. Then cut off any extra-long roots with clippers.

2. Another method is to spray the soil away from the root ball with a strong jet of water, then loosen and uncoil the roots.

3. A third--and more drastic--method is to make several vertical slits in the root ball with a knife to stimulate new root growth.

Kitchen Helpful Hints

1. Prevent raw potatoes from sprouting buds by tossing them into your fridges produce bin - along with one apple.
2. Ripen an avocado fast by placing it in a plastic bag with a piece of banana peel.
3. No Corn Syrup in the House? Mix 1 cup sugar with ¼ cup of water.
4. No molasses, then use honey as a replacement.
5. To soften brown sugar, just add a crust of bread and reseal your container. The brown sugar will soften right up!

NEED A BABYSITTER, DOG WALKED or LAWN MOWED?

AboutMyHOA.com

The Board encourages everyone to visit this site it provides information including directories, treasurer's report, and special notices and news. It also includes an online version of "Covenants and Restrictions" and "By-laws". This is **FREE** service. You will need your member identification to register. This number is on your invoice. If you have misplaced that number contact Amanda Lee. The association budget is posted on-line at aboutmyhoa.com on a monthly basis. If you are interested in seeing where the dues are being spent you can see a monthly breakout by expense type. We will need to evaluate the current annual assessment amount charged to homeowners. This is strictly due to rising costs in postage, water, landscaping and electricity. If anyone has ideas on how to help the association cut costs, please see one of the board members with your suggestions.
